摘要

- Provide analytical support to Novartis key stakeholders to support decision-making processes.
- Support and facilitate data enabled decision making for Novartis internal customers by providing and communicating qualitative and quantitative analytics.
- Generate reports that supervise product metrics, progress, and KPIs.
- This role requires a blend of business insight and technical understanding, enabling you to collaborate with brand teams, marketing teams and all functions to maximize value.
- Technical requirements - SQL, Dataiku, Python is a plus

About the Role

Key Responsibility:

Solid understanding of multiple datasets (e.g. LAAD, Xponent, DDD) and managing and coordinating data sets from databases to find patterns and trends.

Redefining these complex and granular data into actionable insights.

Responsible for standard and ad-hoc extracts/reports across multiple primary and secondary data sources.

Responsible for tracking ongoing outcomes reports and manage priorities for upcoming reports.

Sharing findings with partners with reports and presentations on a timely basis.

Putting together specifications to extract/transform data into required formats for different analytical elements using programming languages like SQL or other data processing tools.

Build the foundation for more sophisticated approaches to APLD analysis and advanced analytics wherever it is required and beneficial.

Establish and maintain positive relationships with key functional partners.

Essential Requirements:

- Ability to work independently and as an integral member of the team and Attention to detail and quality focused, good interpersonal and communication skills, influence, negotiation and tact skills, innovative, and collaborative behaviors and “can-do” orientation.
- Curiosity and strong analytical thinking, verbal and written communication skills and exposure to working in multifunctional/cultural environment.
- Good communication and interpersonal skills. Conceptual, analytical & tactical thinking, strategic thought process.
- Ability to multi-task, work in a demanding distributed team environment, work under tight deadlines. Develop and maintain strong individual performance.

Desirable Requirements:

- Masters or Bachelor 's in STEM
- At least 3+ years of experience in data modeling and reporting solutions development and hands-on experience of APLD and US national and subnational datasets and ability to lead teams functionally.
- Technical abilities: Excel, SQL or Dataiku, and PowerPoint is vital. Knowledge of statistical modeling or ML is a plus.
