摘要

This position will be located at the East Hanover, NJ location and will not have the ability to be located remotely.

About the Role

The Insights and Decision Science (IDS) team is dedicated to enabling improved decision-making at Novartis by leveraging data and advanced analytics capabilities to generate actionable insights that drive business growth. We collaborate closely with the US business, bringing insights and challenging ideas to empower smarter, data-driven decision-making. Reporting into the ED, Integrated Field Execution Effectiveness, this role is crucial in enhancing the performance and impact of the field force.

The AD, Integrated Field Execution Effectiveness plays an important role in conducting the analyses to identify key drivers to improve efficiency and effectiveness of the US field organization. By supporting the development and refinement of key performance indicators for segments the field force, they ensure the field is well-equipped to achieve engagement goals, educational objectives, appropriate patients on medicine, and ultimately US Commercial targets.

Key Responsibilities:

- Support a systematic, comprehensive evaluation of the effectiveness (performance) a given Novartis field team (Commercial, Medical, Novartis Patient Services, etc.)
- Review processes aimed at proactively uncovering key pain points and drivers of success at the field team level
- Implement local level opportunity identification process in partnership with Field organizations
- Provide field team leadership with relevant performance metrics and evaluations to enable responsive, strategic decision making
- Work to establish near-real time awareness of field team performance across their function
- Provide analytics on HCP, Account, & Medical Expert engagement to support their function
- Monitor field force adherence to internal tool (e.g., NBA / decision engine, interactive visual aids, etc) recommendations (e.g., HCP prioritization, call plans, follow-ups), comparing performance of high vs low adopters, etc.
- Identify potential threats and opportunities through proactive competitive benchmarking

Novartis seeks an individual with extensive experience in the pharmaceutical or healthcare industry, with a strong understanding of field force operations and sales strategies. This individual should have a proven track record of leading and managing high-performing teams, with a focus on driving execution effectiveness and achieving strategic objectives. A strong analytical background is essential, with the ability to analyze complex datasets and derive actionable insights.

Essential Requirements:

Education: Bachelor's degree in related field is required; Master of Science and/or MBA preferred

- A Minimum of 6 years of experience in the pharmaceutical or healthcare industry, with a deep understanding of field force operations and sales strategies
- Strong analytical skills with expertise in data analysis and interpretation to drive strategic decision-making and optimize field strategies
- Experience in developing and implementing key performance indicators (KPIs) to measure and enhance field force performance
- Demonstrated experience in managing field force activities, including engagement strategies, sample distribution, and adherence to internal tool recommendations
- Ability to provide data-driven coaching and develop feedback loops and incentive programs to improve field force performance. Strong leadership skills in a team environment which requires negotiation, persuasion, collaboration, and analytical judgment
- Excellent communication skills, with the ability to present complex insights and strategies effectively to diverse audiences, including field leadership and internal stakeholders. Proven ability to engage and collaborate with cross-functional teams, including medical, access, and commercial teams, to align strategies and initiatives
- Ability to thrive in a fast-paced, dynamic environment and adapt to changing business needs and priorities

The pay range for this position at commencement of employment is expected to be between \$152,600.00 and \$283,400.00 a year; however, while salary ranges are effective from 1/1/25 through 12/31/25, fluctuations in the job market may necessitate adjustments to pay ranges during this period. Further, final pay determinations will depend on various factors, including, but not limited to geographical location, experience level, knowledge, skills and abilities. The total compensation package for this position may also include other elements, including a sign-on bonus, restricted stock units, and discretionary awards in addition to a full range of medical, financial, and/or other benefits (including 401(k) eligibility and various paid time off benefits, such as vacation, sick time, and parental leave), dependent on the position offered. Details of participation in these benefit plans will be provided if an employee receives an offer of employment. If hired, employee will be in an “at-will position” and the Company reserves the right to modify base salary (as well as any other discretionary payment or compensation program) at any time, including for reasons related to individual performance, Company or individual department/team performance, and market factors.
