

Senior Specialist, DDIT Development Business Analyst - TRD

Job ID
REQ-10057870

10月 14, 2025

Spain

摘要

Are you passionate about transforming data into meaningful business impact? As a Senior Specialist in DDIT Development Business Analysis for TRD, you ' ll play a pivotal role in shaping how Novartis delivers safe, scalable, and innovative IT solutions to support global drug development. You ' ll collaborate with cross-functional teams, influence decision-making through data-driven insights, and help design systems that improve lab efficiency and compliance. This is your opportunity to make a difference in the lives of patients by enabling smarter science through technology.

About the Role

Key Responsibilities

- Translate business requirements into IT solution specifications that are scalable, secure, and user-centric
- Conduct feasibility assessments and develop project rationale, scope, and cost/resource

estimates

- Collaborate with stakeholders to identify gaps and define functional solutions aligned with business needs
- Ensure traceability between user requirements, specifications, and validation/testing activities
- Support validation processes (OQ, PQ, UAT) and ensure compliance with security and regulatory standards
- Drive user experience considerations in the design and deployment of new solutions
- Facilitate super user training and maintain alignment with internal IT systems and documentation standards

Essential Requirements

- University degree in Informatics, Computer Sciences, Life Sciences, or a related field
- Minimum of 6 years ' experience in the pharmaceutical or IT industry
- Strong background in Lab IT systems such as LIMS, ELN, and chromatography platforms
- Proven experience as a business analyst, process expert, or digital lead in lab environments
- Solid understanding of GxP, 21 CFR Part 11, and computer system validation lifecycle
- Excellent analytical, communication, and stakeholder engagement skills in a global matrix setting

Desirable Requirements

- Prior experience working in TRD with a strong understanding of TRD-specific business processes
- Familiarity with lab data integration platforms and digital transformation initiatives in R&D environments
