摘要

#LI-Hybrid

As an Immunology Medical Science Liaison at Novartis, you ' ll be out in the field– developing peer-to-peer relationships with medical experts and key stakeholders and members of the scientific community, utilizing scientific and medical evidence-based non-promotional materials.

From as early as two years before a new molecule launches, you will strategically prepare and support the development, launch and commercialization of Novartis products through scientific exchange, seeking external insight to shape Novartis understanding of the therapeutic environment. You will respond to unsolicited requests for scientific information and provide clinical trial support.

In this role you will report to Field Medical Excellence and work cross-functionally with Medical Affairs, Clinical, Market Access, and more–translating insights into actions that accelerate access to transformative oncology therapies.

About the Role

Major accountabilities:

Medical Experts Management & Medical Support

- Develop peer to peer scientific relationships, assess advocacy (degree of Medical Expert understanding and agreement with medical platform statements) and contributions (activities in which Medical Experts are independently qualified to engage or collaborate with the organization), and respond to unsolicited requests for scientific information using approved, non-promotional materials with Medical Experts/Key Stakeholders, Health Care Professionals (HCPs) and decision makers.
- Contribute to identification and mapping of Medical Experts/key stakeholders in line with local strategies. Fulfil the Field Medical Excellence metrics expectation in daily practice and document accordingly in system. Evaluate and build the advocacy (degree of Medical Expert understanding and agreement with medical platform statements)
- Provide and discuss scientific information and data with HCPs to ensure quality and accuracy of medical and scientific information on new treatment options including Novartis products and selected areas of therapeutic interest.
- Liaise and provide up-to-date medical support to relevant external groups to ensure evidence based understanding of Novartis products relative to medical guidelines, and health economic information.

Scientific Research Support

- Provide scientific educational activities to support study accrual for key trials as appropriate. Provide feasibility and research site recommendation for Novartis sponsored clinical trials.
- Collaborate with SSO team and Medical Advisors, to support clinical sites, including providing guidance in accordance with guidelines, Novartis Internal Policies, and regulations as appropriate.

Scientific Exchange/Insights

- Support scientific exchange to advance understanding of new scientific principles, novel research trends, and current scientific debate. Provide scientific and educational information to healthcare professionals on specific patient critical issues.
- Collect, analyse and report insights that may impact Novartis development plans /trial designs, launch strategies and tactics and medical education programs tailored to physicians' education needs. Exchange insight monthly with medical team to support strategy.

Scientific Projects

- Implement scientific projects according to global, regional or local medical strategies. Examples may include, but not limited to, epidemiology projects, registries, preclinical or translational research, as well as multi-disciplinary projects involving education and collaboration of multiple functions in the medical community to improve patient diagnosis and

treatment.

Internal Novartis Support

- Serve as a resource for projects and collaborate with internal colleagues. Being able to multitask and competent to conduct delicate and effective communication with miscellaneous stakeholders. Collaborate with Medical Advisors/TA Medical Teams and other cross-functional groups (i.e. Business Franchise Teams, Market Access).

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives.
