

Cardiologist Translational Medicine Expert (TME)

Job ID
REQ-10067444

11月 26, 2025

Switzerland

摘要

BioMedical Research (BR) is the innovation engine of Novartis that collaborates across the company and beyond, focusing on powerful new technologies that have the potential to help produce therapeutic breakthroughs for patients. Translational Medicine (TM) is the clinical research arm of BR, and includes about 900 associates globally. TM plays a pivotal role in bringing innovative medicines to patients, by building on research advances to develop new therapies, and bridging drug discovery and clinical application.

The TM Discovery & Profiling (TMDP) is a group of physicians and clinical researchers who drive innovative science from discovery to the patient through the selection, profiling, and effective development of medicines. Translational medicine experts oversee Phase 1 and 2 clinical trials to demonstrate proof-of-concept (PoC) in patients, as well as support for Phase 3 development. Translational medicine experts are key and highly visible members of global cross-functional project teams that design and implement early research and discovery projects, that then culminate in clinical PoC studies. Translational medicine experts collaborate with colleagues in biology and chemistry to identify targets in diseases with significant unmet medical needs and provide input on likely clinical development pathways. The PoC studies led by our translational medicine experts are among the most critical steps in drug development at

Novartis. After PoC and if the program proceeds to full development, the translational medicine expert continues as a key member of the full development team up to and including registration.

About the Role

Job title (Cardiologist Scientist Associate Director, Level 5 / Cardiologist Scientist Director, Level 6 and associated responsibilities will be commensurate with the successful candidates' level of expertise)

This position will be located in Basel, Switzerland

#LI-Hybrid

About the role:

As a Cardiovascular Metabolism (CVM) TM Expert, you will collaborate with the CVM TM Head or other experienced TM Expert to develop high value decision-strategies for the Translational Medicine component of drug development projects and lead global cross-functional project teams through the PoC phase and beyond.

Job Description

Key Responsibilities:

- Lead global project teams through PoC phase to drive implementation of the PoC strategy; participate in project teams through program life cycle from NTRC to registration
- Responsible for clinical portions of the Integrated Development Plan (IDP) through PoC.
- Acts as medical monitor for one or more clinical studies
- Communicate clinical team matters to project teams and relevant decision boards (Disease Area Decision Board).
- Convene relevant (internal and external) leaders to consider proposed approach to PoC.
- Evaluate clinical centers and foster communication with crucial collaborating investigators
- Oversee publication and external presentation of PoC clinical study results
- Accountable for compound related biomarker strategies; work closely with biomarker experts in implementation
- In collaboration with research scientists identify, develop and implement strategy for preclinical support of program related objectives; this includes assessment of medical need, proposal of clinical development pathways, and review of preclinical data for clinical implications and other relevant activities
- Participate in team presentations to Health Authorities as TM Expert

Essential Requirements:

- Doctoral degree, MD required with clinical subspecialty training preferred in cardiovascular disease or endocrinology/metabolic disease; Additional PhD/post-doctoral equivalent research preferred.
- At least 1-2 years ' experience in a pharmaceutical/biotech company, CRO, or academic medical center, or related experience; 5 plus years to be considered for Director level.
- Recognized for medical expertise.
- Recognized for scientific expertise: respected by colleagues internally and externally, have made significant contributions to the field and created / established new concepts; record of high quality publications in international scientific journals.
- Excellent written and oral communication/presentation skills.
- Independence: Able to work independently on study planning and execution, and with supervision on project planning.
- Leadership of Collaborations: Able to lead multidisciplinary teams in a matrix organization.
- Innovation: Seeks out new clinical discovery opportunities and PoC approaches.
- Additional consideration for candidates with advanced research experience in data science, genetics/genomics, AI or digital methods in electrocardiography and/or cardiovascular imaging.
- Demonstrated passion for science.

Commitment to Diversity and Inclusion / EEO paragraph

Novartis is committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.

Accessibility and Accommodation:
