摘要

Location: Hyderabad

This role will be accountable for the solution design of Process Automation Solutions using BPM technologies like Appian and Low code platforms like PowerApps in the area of Enterprise Content & Automation Services and will be part of our “Architecture, Platforms & Data” team in Technology Transformation Organization in Novartis

About the Role

Major Accountabilities:

- Organize solution design, development and deployment efforts for projects by compiling the

- required resources and assigning responsibilities according to a defined time schedule
- Ensure that detailed designs match high level designs and are traceable to requirements in functional specification. Ensure designs produced adhere to architectural roadmap and support the development, execution and operations of solutions
- Ensure that solutions meet requirements outlined in the design documentation. Ensure the overall user experience is taken into account when designing and deploying new solutions and services
- Ensure that developed solutions are peer reviewed, formally documented and signed off by business
- Ensure that all work is delivered to agreed time, cost and quality constraints. Initiate solution testing to ensure they meet quality standards
- Authorize and conduct service handover and lead the go-live authorization discussions with the other work streams
- Take accountability to ensure adherence with Security and Compliance policies and procedures within Solution Delivery scope. Exhibits awareness and advanced thinking around larger architectural and business drivers and leads the charge to bring about changes to the domain/enterprise architecture and solutions accordingly.
- Organize/run Innovation networks, drive innovations discussions & PoC 's, manage associates working on Innovations tasks.

Minimum Requirements

- Strong knowledge in more than one Business Domain and Technology with 8+ years of experience
- Advanced business analyst and technology skills. Advanced Agile and hybrid SDLC experience. Excellent communication, collaboration, facilitation and business partnership capabilities
- Good understanding of Business Process Management (BPM) Lifecycle and must have worked on large scale implementations in the past
- Very strong background on Planning and Delivering solutions and delivering Projects using BPM suites like Appian, Celonis, Adonis etc.(Preferred but not Mandatory)
- Should have a good knowledge on identifying potential applications of AI/ML, RPA etc. in process automation
- Must have Knowledge of Estimating project scope and level of effort for new projects and/or existing projects that require changes, tasks, duration, resourcing, etc.
- Experience with formal requirements specification and formal system validation a plus
- Broad technical background, working understanding of the following: DB development, Java development, XML and related technologies, integration and messaging technologies, BPM Suites like Appian, Oracle BPM, Pega etc.
- Any technology certifications are a plus
