摘要

-Design, plan, perform, interpret and report results of scientific experiments for the preparation and timely delivery of drug substances (DS), drug products (DP), processes and procedures within a multifunctional project team coordinated by a Project Leader. Manage technical lab/plant activities.

-Management TrackLead a team for the development of pharmaceutical/biological/cell-gene therapies working in a small manufacturing plant environment. Execute the functional strategy and drive operational excellence in line with TRD vision and strategy. Lead and manage all project/local network activities, support/coach team members, participate in sub-teams and contribute to overall SZ strategies and goals

-Senior Scientist: Design, plan, perform -document and interpret scientific/developmental experiments and GMP testing or pilot plant processes for the preparation and timely delivery of generic products, processes or procedures; maintain and qualify equipment/infrastructure and manage operational aspects in lab or plant as assigned.

About the Role

Major accountabilities:

- Independently plan, organize, perform and document scientific experiments /GMP testing /manufacturing plant activities under minimal supervision; handle several activities at a time
 - Take over responsibility for and utilize special tools /equipment or specialized facilities as an expert; schedule and perform maintenance and qualification of instruments / equipment
 - Proactively identify conflict situations and contribute to solutions
 - Work according to appropriate standards for quality, ethics, health, safety, environment protection, and information security; lead initiatives to ensure continuous improvement
 - Documentation of raw data, evaluate and interpret results; propose and actively support the design of next experiments.
- Review and verify raw data generated by others; approval of tests / experiments performed by others
 - Write protocols, scientific reports or lab procedures based on templates or SOPs under minimal supervision
 - For technical development units: Develop new methods or optimize existing methods/processes (lab or plant); contribute to development and implementation of new technologies
 - For GMP units: ensure compliance to cGMP
 - For technology-focused roles: Perform information and literature searches under minimal guidance.
- Actively foster knowledge exchange. Train and coach associate scientists, technicians, temporary employees and employees under training / education
 - For project-focused role: Participate in function-specific sub teams and fulfill assigned project tasks and responsibilities under supervision
 - Uses professional concepts and company's policies and procedures to solve a wide range of difficult problems in imaginative and practical ways.
- Establish innovative solutions for verification and control of critical quality attributes, critical material attributes or critical process parameter in cooperation with other colleagues.
- Establish control procedures and specifications and review test procedures. Generate scientific documents to hand over to internal and / or external partners (e.g., MST, TechOps, authorities, external companies) and support generation of international registration documents under minimal supervision.
- If assigned this task, maintenance of infrastructure / equipment and required investments (e.g. system ownership)
 - Generate lab procedures or SOP ' s, generate protocols and reports
 - Lead technical meetings during product development at the local level as well as on the level of SDC network
 - Report and present scientific /technical results internally and contribute to publications, presentations and patents.
- Report and present scie. Reporting of technical complaints / adverse events / special case scenarios related to Novartis products within 24 hours of receipt. Distribution of marketing samples (where applicable)

Minimum Requirements:

- Operations Management and Execution.
- Collaborating across boundaries.
- Health And Safety (Ehs).
- Laboratory Equipment.
- Manufacturing Process.
- Process Simulation. Project Management.
- Technical Writing.
- English.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives. Ready to create a brighter future together? <https://www.novartis.com/about/strategy/people-and-culture>

Benefits and Rewards: Learn about all the ways we'll help you thrive personally and professionally. [Read our handbook \(PDF 30 MB\)](#)
