

Associate Director Biostatistics

Job ID
REQ-10069498

1月 13, 2026

United Kingdom

摘要

Office Location: London (The Westworks), United Kingdom
#LI-Hybrid Hybrid (12 days per month on-site if living within 50 miles of our London office)

#LI-Remote Remote (if living beyond 50 miles of our London office)

200+ compounds in Novartis are supported by biostatisticians in 10+ sites around the globe. Biostatisticians transform clinical data into analyses that build the basis for making innovative drugs accessible for patients. They influence decision-making in cross-functional international teams from early to late phase drug development.

We have an exciting opportunity for an Associate Director, Biostatistics to join a passionate team within Advanced Quantitative Sciences - Full Development. Come to an industry leader where you will lead implementation of modern and innovative trial/experimental designs, statistical models, analysis and data exploration methodologies at the study or project level and you will be responsible for all statistical work, scientific and operational, in collaboration with the clinical trial teams and other quantitative partners.

About the Role

Your Key Responsibilities:

- Accountable for strategic statistical input and influence into one or more studies or projects.
- Plan and execute exploratory analyses and statistical consultation within your cross-functional teams.
- Lead development and implementation of innovation in statistical methodology and trial design.
- Lead collaborations with medical and other strategic functions to drive quantitative decision making in drug development and enable successful impact on robust drug development plans.
- Propose and implement innovative designs and methods to optimize drug development.
- Plan, prioritize and oversee study level activities and ensure efficient re-source management within or across franchise and effective partnership with vendors.
- Effective partnership with other functions to ensure integrated quantitative input into project.
- Develop and mentor biostatisticians

Role Requirements:

- PhD with experience preferred or MS with extensive experience with a degree emphasis in Statistics, Mathematics or equivalent
- Advanced knowledge of applying statistics and innovative approaches expert knowledge in a variety of statistical areas
- Influences decisions that directly impact the project and department ability to deliver objectives
- Record of successful implementation of novel methods and/or innovative strategies in drug development
- Strong interpersonal and communication skills bridging scientific and business needs

Desirable Requirements:

- Prior experience with early phase drug development needs and activities

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives.
