

Principal Scientist I/II - Analytics

Job ID
REQ-10083686

7月 23, 2026

Slovenia

Available in: English

摘要

#LI-Hybrid

Location: Menges, Slovenia

Interni naziv pozicije / Internal job title: Vodilni raziskovalec I/II / Principal Scientist I/II

Role Purpose:

Our R&D unit in Menge š is looking for a motivated and highly experienced scientist in field of Mass Spectrometry (MS) and Physical Chemistry Analytics (PCA) to join us and help us develop a diverse portfolio of biotherapeutic modalities.

As a Principal Scientist you must demonstrate a broad and in-depth knowledge of mass spectrometry (MS) technologies and physico-chemical analysis (PCA) to evaluate the developability of various biologics modalities covered by Novartis Biomedical Research and Development units, ranging from traditional antibodies to advanced biologics formats and mixed modalities. You will support cell line

development, process optimization, formulation, and material release for in-vivo studies using state-of-the-art methodologies.

You will functionally lead a team of associates where you will be responsible for a continuously strong culture of team spirit and integrity, as well as providing development opportunities for associates on different levels.

We offer a stimulating work environment, ample opportunities for growth and development, and the chance to make a significant impact on the future of medicine. If you are a motivated and talented scientist with a passion for biomedical research, we invite you to apply and become a part of our dynamic team at Novartis.

Naša R&D enota v Mengšu išče motiviranega in zelo izkušnega raziskovalca s področja masne spektrometrije (MS) in fizikalno-kemijske analitike (PCA), ki se nam bo pridružil in nam pomagal razvijati raznolik portfelj bioterapevtikov.

Kot Vodilni raziskovalec I/II morate izkazovati široko in poglobljeno znanje tehnologij masne spektrometrije (MS) in fizikalno-kemijske analize (PCA) za oceno razvijljivosti različnih bioterapevtikov, ki jih pokrivajo Novartisove enote Biomedicinskih Raziskav in Razvoja, od tradicionalnih protiteles do naprednih bioloških formatov in mesečnih modalitet. Podpirali boste razvoj celotnih linij, optimizacijo procesov, formulacijo in sproščanje materiala za študije in vivo z uporabo najsodobnejših metodologij.

Funkcionalno boste vodili ekipo sodelavcev, pri čemer boste odgovorni za stalno močno kulturo timskega duha in integritete ter za zagotavljanje razvojnih priložnosti za sodelavce na različnih ravneh.

Ponujamo spodbudno delovno okolje, številne priložnosti za rast in razvoj ter možno pomembnega vpliva na prihodnost medicine. Če ste motiviran in nadarjen znanstvenik s strastjo do biomedicinskih raziskav, vas vabimo, da se prijavite in postanete del naše dinamične ekipe v Novartisu.

About the Role

Key Responsibilities:

- Lead and drive the analytical characterization efforts by MS and PCA methodologies of biological formats such as monoclonal antibodies, multispecific antibodies and other therapeutic proteins, transitioning from research to clinical development
- Contribute experimentally to characterize biologics by mass spectrometry including sample preparation, analysis, evaluation, interpretation and reporting
- Prepare and communicate analytical strategies and results at internal and external meetings, as well as in scientific publications if appropriate
- Functionally manage the analytical team and resources, project activities, timelines, maintain a strong customer focus, pro-actively align within global R&D analytics community and set respective objectives for your team
- Provide scientific leadership and clear guidance to the team, optimally leveraging the expertise and experience of individuals

- Drive a culture of collaboration, integrity, and team development, and ensure a safe, empowering, and inspiring working environment

Minimum Requirements - What you will bring to the role

- PhD degree in biochemistry, chemistry, biophysics or a related field with 2 years of experience in pharmaceutical industry, or MSc degree in biochemistry, chemistry, biophysics or a related field with 5 years of experience in pharmaceutical industry
- Strong scientific background in characterization of recombinant proteins by mass spectrometry including experience with modern LC-MS techniques (Intact/reduced/subunit RPMS, peptide mapping, released glycans). Experience with data analysis workflows and report generation.
- Experience with one or more PCA technologies such as liquid chromatography, capillary electrophoresis-based analysis, chip-based technology, calorimetry, viscometry, or light scattering is recommended.
- Proven experience in successfully prioritizing and keeping complex project timelines, excellent organizational skills with the ability to run multiple projects in parallel
- Distinguished team spirit and scientific drive
- High flexibility combined with excellent organizational and communication skills
- Fluency in English (oral/written)

Desirable Requirements:

- Proven ability to lead, coach, and develop people

Ključne odgovornosti:

- Voditi in usmerjati prizadevanja za analitično karakterizacijo z metodologijami MS in PCA za biološke koformate, kot so monoklonska protitelesa, multispecifični naprotitelesa in drugi terapevtski proteini, pri prehodu iz raziskav v klinični razvoj
- Prispevati k karakterizaciji bioloških izdelkov z masno spektrometrijo, vključno s pripravo vzorcev, analizo, vrednotenjem, interpretacijo in poročanjem
- Pripraviti in komunicirati analitične strategije in rezultate na internih in eksternih srečanjih, kadar je primerno, v znanstvenih publikacijah
- Funkcionalno vodenje analitične ekipe in virov, projektnih aktivnosti in časovnic ohranjati močno središče enostane stranke, proaktivno usklajevati delo z globalno skupnostjo za analitiko v R&D ter določati ustrezne cilje za svojo ekipo

- Zagotavljati znanstveno vodenje in jasne usmeritve ekipi ter optimalno izkoristi človeški strokovno znanje in izkušnje zaposlenih
- Spodbujati kulturo sodelovanja, integritete in razvoja ekipe ter zagotavljati varno in navdihujoče delovno okolje

Minimalne zahteve – kaj boste prinesli v vlogo

- Doktorat znanosti (PhD) iz biokemije, kemije, biofizike ali sorodnega področja 2 leti izkušnje farmacevtski industriji; ali Univerzitetna izobrazba / magisterij (MSc) iz biokemije, kemije, biofizike ali sorodnega področja 5 leti izkušnje farmacevtski industriji
- Močno znanstveno ozadje na področju karakterizacije rekombinantnih proteinov z masno spektrometrijo, vključno z izkušnjami sodobnimi tehnikami LC-MS (intaktna/reducirana/subenotna RPMS analiza, peptidno kartiranje, sproščeni peptidi). Izkušnje z delovnimi tokovi analize podatkov in pripravo poročil
- Izkušnje z eno ali več tehnologijami PCA, kot so tekočinska kromatografija, kapilarna elektroforeza, tehnologije na črpalni kalorimetrija, viskozimetrija ali sipanje svetlobe.
- Dokazane izkušnje pri uspešnem določanju prioritete in ohranjanju kompleksnih projektnih časovnic odlične organizacijske sposobnosti ter zmogljivost vodenja več projektov vzporedno
- Izraziti timski duh in znanstvena zagnanost
- Visoka prilagodljivost v kombinaciji z odličnimi organizacijskimi in komunikacijskimi veščinami
- Tekočo znanje angleščine (ustno/pisno)

Zaželeno zahteve:

- Dokazana sposobnost vodenja, mentoriranja in razvoja ljudi

Benefits & Rewards

At Novartis, we're committed to reimagining medicine together - and rewarding the people who make it happen.

Expected Annual Base Salary Range for role: € 46,550 to € 86,450

The base salary offered is determined based on gender-neutral objectives, such as relevant skills, competencies and experience in accordance with the Novartis pay setting policy and upon joining Novartis will be reviewed periodically.

In addition to your base salary, you may be eligible for a performance-based bonus depending on certain performance parameters.

The rewards of being part of our team go far beyond base pay and incentives. We also offer a variety of competitive benefits in kind to help you thrive personally and professionally, such as insurance plans, retirement plans, wellbeing resources and global recognition programs. In addition, we provide flexible and hybrid working options, where possible, and minimum 14 weeks paid parental leave.

Koristi in nagrade

V Novartisu smo zavezani skupnemu preoblikovanju medicine - in nagrajevanju ljudi, ki jo uresničijo.

Pričakovani letni osnovni plačnikni razpon za delovno mesto: € 46,550 do € 86,450

Osnovna plača je določena glede na spolno nevtralne cilje, kot so relevantne veščine, kompetence in izkušnje v skladu s politiko plač Novartisa, ob vstopu v Novartis pa se redno pregleduje.

Poleg osnovne plače ste morda upravičeni do bonusa na podlagi uspešnosti, odvisno od določenih parametrov uspešnosti.

Nagrade, ki jih prinaša članstvo v naši ekipi, segajo daleč preko osnovne plače in spodbud. Ponujamo tudi različne konkurenčne ugodnosti v naravi, ki vam pomagajo uspevati osebno in poklicno, kot so zavarovalni načrti, pokojninski načrti, viri za dobro počutje in globalni programi priznanja. Poleg tega ponujamo prilagodljive in hibridne možnosti dela, kjer je mogoče, ter najmanj 14 tednov plačanega starševskega dopusta.

Why Novartis: Helping people with disease and their families takes more than innovative science. It

takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients ' lives. Ready to create a brighter future together? <https://www.novartis.com/about/strategy/people-and-culture>
