

Medical Science Liaison, Breast Cancer - Western Canada

Job ID
REQ-10087772

9月 14, 2026

Canada

摘要

#LI-Remote

Location: British Columbia or Alberta, Canada

This role is based in British Columbia or Alberta, Canada. Novartis is unable to offer relocation support for this role: please only apply if this location is accessible for you.

As a Medical Science Liaison (MSL) for Breast Cancer, you will play a key field-based scientific role in building strong relationships with targeted external experts, enabling deep data-driven scientific discussions, and understanding territory needs to support impactful medical engagement.

About the Role

Key responsibilities

- Build and maintain strong scientific relationships with targeted external experts, ensuring engagement is credible, compliant, and aligned with territory needs.
- Lead high-quality scientific exchanges on the therapeutic area, applying robust disease-area and product knowledge to support deep data discussions with healthcare professionals and external stakeholders.
- Develop a strong understanding of local territory dynamics, expert networks, and unmet needs to inform field medical priorities and support effective stakeholder engagement planning.
- Act as a proactive field-based medical partner, identifying opportunities to add scientific value through timely insights, expert interactions, and appropriate medical education activities.
- Collaborate cross-functionally with internal medical, commercial, and market access colleagues while maintaining the independence and integrity of the MSL role.
- Gather, synthesize, and communicate relevant external insights from the field to help inform medical strategy and support patient-focused decision making.
- Represent Novartis externally with strong communication, people skills, business acumen, and the ability to translate complex scientific information into clear and meaningful discussions.
- Contribute to a team of three MSLs by sharing knowledge, best practices, and territory learnings; this role has no direct people management responsibilities.
- Ensure all activities are conducted in accordance with applicable compliance, ethical, and scientific standards.

Essential Requirements

- Advanced scientific, medical, or healthcare-related education preferred; relevant MSL or field medical experience in Canada is an asset; strong communication skills are highly desirable for engagement across the territory.
- Strong scientific knowledge with the ability to conduct credible, in-depth data discussions with external experts.
- Demonstrated ability to build trusted relationships with targeted experts and healthcare stakeholders.
- Solid understanding of territory needs, local healthcare dynamics, and external expert engagement requirements.
- Excellent communication and vulgarization skills, with the ability to translate complex scientific concepts into clear, audience-appropriate messages.
- Proactive mindset, strong interpersonal skills, and the ability to work effectively in a field-based environment.
- Business acumen and strategic thinking to prioritize opportunities and align field activities with medical objectives.
- Strong cross-functional collaboration skills and commitment to compliant, ethical, and patient-focused scientific engagement.

Commitment to Diversity and Inclusion: Novartis is committed to building outstanding, inclusive work environment and diverse team ' s representatives of the patients and communities we serve.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients ' lives. Ready to create a brighter future together? <https://www.novartis.com/about/strategy/people-and-culture>

Benefits and Rewards: Learn about all the ways we ' ll help you thrive personally and professionally. [Read our handbook \(PDF 30 MB\)](#)
