

Intern DDIT APD D&A Agentic Orchestration Integration Engineering

Job ID
REQ-10090206

十月 18, 2026

India

摘要

This role offers a unique opportunity to learn, innovate, and contribute to next-generation AI-powered integration solutions that support thousands of employees globally. You will gain hands-on experience building enterprise-grade integrations that serve as a critical backbone for Novartis, enabling the secure and reliable exchange of millions of transactions and events across the organisation.

About the Role

What You 'll Do

- Design and develop innovative integration solutions to connect AI Agents and Model Context Protocol (MCP) Servers with enterprise applications across the Novartis ecosystem.

- Build and automate secure, scalable integrations using API Management, Event Streaming, Messaging, and Enterprise Integration platforms.
- Collaborate with experienced architects, engineers, and product teams to solve real-world business challenges and deliver enterprise-grade solutions.
- Contribute to AI-driven integration initiatives, proof-of-concepts, innovation challenges, hackathons, and technical learning programs.
- Support the integration of AgentCore Gateway with internal and external platforms such as Workday, ServiceNow, and other strategic enterprise systems.

What You 'll Learn

- Agentic AI and Multi-Agent Integration Architectures
- Enterprise Integration Platforms and Middleware
- API Design, Development, and Management
- Event-Driven Architecture, Messaging, and Automation
- Agile Delivery Methodologies and Enterprise Engineering Best Practices

Who We 're Looking For

- Pursuing a B.E./B.Tech degree in Computer Science, Information Technology, Artificial Intelligence, Electronics, Data Science, or a related discipline.
- Strong analytical, problem-solving, and critical-thinking capabilities.
- Passion for exploring emerging technologies, Artificial Intelligence, and enterprise-scale platforms.
- Good communication, collaboration, and stakeholder engagement skills.
- Foundational knowledge of Python, REST APIs, networking, security concepts, or cloud technologies.
- Curiosity, creativity, and a willingness to learn in a fast-paced, innovation-driven environment.

What We Offer

- Structured learning and hands-on training in Enterprise Integration, API Management, Eventing, and Agentic AI technologies.

- Mentorship from experienced platform architects, engineers, and technology leaders.
- Real-world experience contributing to strategic enterprise initiatives and production-grade solutions.
- Exposure to large-scale integration platforms supporting thousands of users and millions of transactions across a global organization.
- Opportunities to participate in innovation programs, hackathons, and technology communities.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives.
